

应用领域： 高端醫療器械、  
保健器材、  
汽車用品

Application: High-end medical equipment,  
Health care equipment,  
Automotive products

| 產品參數表 Parameters                       |                       |              |   |                 |                      |                             |
|--|-----------------------|--------------|---|-----------------|----------------------|-----------------------------|
| 型號<br>Model                            | 額定電壓<br>Rated voltage | 介質<br>Medium | 空載流量<br>Free Flow                               | 空載電流<br>Current | 最大壓力<br>Max pressure | 空載噪音<br>Noise under no load |
| CJAP32-AB12B5                          | DC 12V                | 空氣 air       | ≥6.0L/min                                       | ≤650mA          | ≥90KPa               | ≤60dB @50cm                 |
| 其他參數 Others                            |                       |              |   |                 |                      |                             |
| 壽命模式 Life test                         |                       |              | 600 cycles, DC12V, @30kPa, 20min ON , 20min OFF |                 |                      |                             |
| 使用環境 Working environment               |                       |              | 5 C~45 C , 30%~80%RH                            |                 |                      |                             |
| 不同電壓規格可定制。 Different voltage available |                       |              |   |                 |                      |                             |
